BARR PRECISION OPTICS & THIN FILM COATINGS

United States
 Buellton, California
 Tyngsboro, Massachusetts
 Westford, Massachusetts

Europe
 London, England

Asia
 Seoul, South Korea
 Shanghai, China
 Taipei, Taiwan
 Tokyo, Japan

ABOUT MATERION

Materion is among the world's premier providers of advanced materials solutions and services and is listed on the New York Stock exchange under the symbol MTRN. Under the Materion brand, Barr Precision Optics & Thin Film Coatings is aligned to deliver a broader scope of products and services with the technical expertise necessary to drive our customers' growth and profitability. Our goal is to become your first choice in a partner.

MATERION BUSINESSES

- | | |
|---------------------------------------|-----------------------------|
| Advanced Chemicals | Electrofusion |
| Precision Optics & Thin Film Coatings | Large Area Coatings |
| Brush Beryllium & Composites | Microelectronics & Services |
| Brush Performance Alloys | Natural Resources |
| Ceramics | Technical Materials |

BARR PRECISION OPTICS & THIN FILM COATINGS

Solutions for Automotive Applications

Materion Barr Precision Optics & Thin Film Coatings sees our customers as partners and allows them to tap into our global network of technical knowledge. As the world's largest manufacturer of precision thin film coatings, optical filters and opto-mechanical systems, we produce superior quality products at our strategically located facilities. For high-technology automotive applications, we deliver innovative products to meet your needs. In addition, we service a wide range of industries such as projection display, thermal imaging, defense, commercial, space, astronomy and science markets, with the goal of being our Customers' First Choice™.

UNMATCHED EXPERTISE AND HERITAGE

We combine more than 125 years of experience and accumulated expertise in metallurgy, chemistry, thin film deposition, precision optical coatings and optical assembly. Comprehensive technical competencies are applied in a broad range of highly specialized and high volume applications, including automotive, terrestrial and space-based astronomy, high-energy lasers, night vision, environmental sensing, blood analysis, DNA sequencing, surveillance, targeting, gas and fire detection, projection displays, mobile phones and cameras.

BREADTH OF TECHNOLOGY SOLUTIONS

Whether its optical coating, specialized thin film deposition or optical assembly, we take technology to a whole new level. To meet your most challenging applications, we provide a number of deposition technologies including IBS, IAD, magnetron sputtering and thermal evaporation, as well as state-of-the-art process controls and thin film design methodology. Our core competencies include advanced micro lithography, ultra-low defect coating, and opto-mechanical assembly, allowing us to deliver a breadth of innovative options and integrated solutions.

INDUSTRY LEADER

We are proud to offer unparalleled levels of products, applications and services. Our customers benefit from our strategically located global facilities that provide regional manufacturing and technical support. We deliver innovative designs and prototype solutions fully supported by a volume manufacturing environment. This contributes to reduced cost and creates a competitive market advantage. We have a passion for how we serve our customers and strive to be your partner of choice.

SUPERIOR QUALITY AND FAST TURN-AROUND

Our facilities are fully ISO 9001:2008 certified and our technologies carry all relevant industry quality and safety certifications. We offer state-of-the-art spectral and film properties testing to ensure high quality. To meet diverse customer requirements, we have the flexibility to manufacture in prototype or high-volume quantities. With our quick-turn around and rapid-prototyping capabilities, we can bring groundbreaking products to market faster.

PRODUCTS, SERVICES, TECHNOLOGY, INNOVATION

We offer customers unique expertise in coating design and deposition, combined with an unmatched range of products, services, technology and innovation.

125 YEARS of combined thin film experience.

5 MANUFACTURING FACILITIES strategically located throughout the world.

100 COATING CHAMBERS to meet your most demanding coating applications needs and for quick turnaround.

40+ SCIENTISTS AND ENGINEERS provide technical assistance. Call to talk directly to an applications engineer.

THE NUMBER 1 "GO-TO" PRECISION COATER for sophisticated high-value components.

SOLUTIONS DELIVERED

Our worldwide team of engineers and scientists can develop innovative solutions for demanding thin film optical coating applications and opto-mechanical devices. Visit www.materion.com/barroptics

Automotive

APPLICATIONS

- Thermal Night-vision
- Active Night-vision
- Head-up Displays
- Interactive Displays
- Fuel Quality Sensing
- Sensing Cameras
- Facial Expression Recognition
- Gesture Control

KEY PRODUCTS

- Thermal Imager Lids & Lenses
- NIR Night-vision Filters
- HUD Projector Components & Assembly
- Interactive Displays Components
- Linear Variable Filters
- Multispectral Filter Arrays
- Low Defect Image Sensor Lids
- NIR Band-pass Filters

CORE TECHNOLOGIES

- Magnetron Sputtering
- Ion Beam Sputtering
- Thermal Evaporation
- Ion Assisted Deposition
- Low Defect Coating
- Microlithography
- Glass Processing
- Wafer-level Bonding
- Opto-mechanical Assembly
- High Volume Manufacturing
