### Upcoming Events

It's not too early to be thinking about Defense & Commercial Sensing April 26, 2020 at the Anaheim Convention Center in CA. We are already planning our exhibit at this popular conference which is the Leading global event on sensing, imaging, and Photonics technologies.

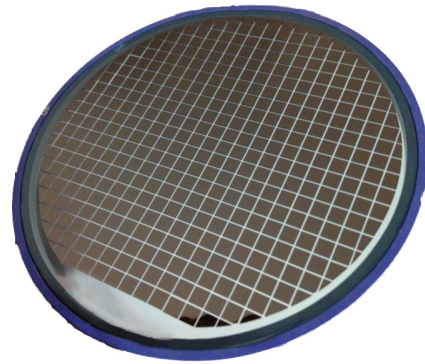

Check our [event](#) page often for updates.

### **SPIE.** DEFENSE+ COMMERCIAL SENSING

### Product Spotlight Diamond Like Coatings

Our DLC coatings are applied using Plasma Enhanced Chemical Vapor Deposition (PECVD) which is a chemical vapor deposition process used to deposit thin films from a gas state or vapor to a solid state on a substrate. This capability compliments our full in-house suite of capabilities and can be applied to a variety of substrates.

## Back to School

School is now in session and we helped by donating \$600 to purchase backpacks and supplies to give to the [House of Hope](#), Lowell, MA. Employees also did their part in collecting and filling over 50+ backpacks with school supplies. Some of the items the children received are notebooks, pencils, and pens, erasers, scissors, and crayons. House of Hope distributes these backpacks to local children from more than 43 homeless shelters and other social service programs locally. We are

glad to have helped these children get a fresh start in the new school year.
