

NEWS & UPDATES

UPCOMING TRADESHOWS

BIOS/Photonics West, March 6-11
 Defense & Commercial Sensing, April 12-16

BIOS/Photonics West - March 6-11

Live plenary talks, on-demand technical presentations & discussions, online networking, and a digital marketplace showcasing product demonstrations and business connections.

Visit our various Marketplaces, which will be live the week of the show, to watch informational videos and download valuable content.

Two Great Companies

One Powerful Team

High-Reliability Microelectronic Packaging for Photonic Devices

Ask about Materion's Visi-Lid™ covers, our patented hermetic optical cover lid assembly for sensitive photonic devices. We offer anti-reflective (AR) coated window options for light-sensitive electronics, and our high purity AuSn solder and other alloys deliver a hi-reliability solder seal. With 50+ years of materials experience, we are your single source for hermetic lid package manufacturing and delivery. Applications include LIDAR, smart glasses, optical sensors, MEMS, light sensors and more!

PRODUCT SPOTLIGHT

Multizone Filters for Order Sorting

We provide customized linear variable filters (LVF) in wavelengths between 300 nm to NIR. Bandpass, long pass, and short pass filters are available and blocking levels as low as OD5 can be achieved. Combining high transmission long and short pass filters, variable bandpass filters with various bandwidths can be designed.
