Upcoming Tradeshows

February brings a busy month for Materion's Precision Coatings. We are attending four shows this month and we hope to connect with you at one or more of the following shows:

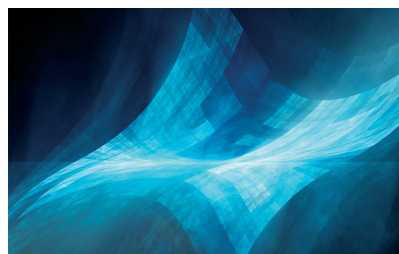

February 4-6 stop by Materion's booth #1656 at the [Photonics West](#) at the Moscone Center, San Francisco, CA, to learn more about our High Performance Optical Coatings (UV through LWIR). [Learn more.](#)

February 11-13 stop by Materion's booth #1285 at [MD&M West](#) at the Anaheim Convention Center, CA, to learn more about our Precision Thin-film Coatings for medical sensing. [Learn more.](#)

February 24-27 stop by Materion's booth #105 at [FLEX 2020](#) at the Doubletree Hilton, San Jose, CA, to learn how we leverage our broad resources and capabilities in product development and high volume production. [Learn more.](#)

February 25-26 stop by and meet Meet Dave Harrison, Business Development Manager, during [Paris Space Week\(PSW\)](#), at The Air and Space Museum at the Paris-Le Bourget. [Learn more.](#)

Product Spotlight
Customized Solutions for Life
Science & Clinical
Instrumentation

Materion's life science and clinical instrumentation solutions lead the industry in performance, reliability and price. We produce optimal interference filters that provide exceptional image contrast, optical quality and long-life spans for life science, medical & analytical uses. These fluorescence filters that perform well over a wide spectral range, from the UV through near IR.
