Astronomical Telescopes + Instrumentation Digital Forum

Join us at the AST digital forum Dec 14-18 where Dave Harrison, Business Development Manager of Precision Coatings at Materion will present his poster on Large Area Optics laboratory capabilities. We are able to provide high performance optical interference filters in sizes much larger than those previously available. More than 2,500 researchers and team leaders will meet to discuss the status of ongoing and future telescope projects. [Register to attend](#)

Product Spotlight ColorWheel™

As the world's largest manufacturer of color wheels, we have an unmatched heritage in offering a variety of total light management solutions including dichroic color separation filters, UV/IR filters, solid and hollow light integrators, high reflectivity folding mirrors, AR-coatings, light engine procurement assembly and testing.
