**Order-Sorting Filters**

Order Sorting Filters (OSFs) from Materion are designed to meet individual customer requirements and specifications. Having access to a custom-designed OSF means, for example, that the designer of a grating-based optical system is afforded the filter solution best suited to control higher order diffraction effects in their particular optical system.

Order Sorting Filters from Materion are offered in two types, Interference-type and Absorption-type.

- Interference-type Order Sorting Filters
- Patterned interference Filter Coatings as Order Sorting Filter
- Linear variable Filter Coating as Order Sorting Filter
- Absorption-glass-type Order Sorting Filters
