Profiled Strip Metal for Consumer Electronics
**Preshaped Strip Metal**

- Enable smaller profile devices
- Eliminate costly coining or forging step
- Profiling improves forming constraints
- Not limited by width, temper, or thickness differentials

*If you can draw it.... we can make it!*

**What’s New: Zone Annealing**

- Combine with electron beam “zone annealing”
- Selectively anneal locations across the strip width

*Create Ductile and Spring Hard locations side by side in 500 kg coils!*

*Reduce Bend Radius Clearances*

*Electron Beam Zone Annealing (DPH indents show softening in bend location)*
